

PYXIS PARTNERS  
PATHWAYS TO PROGRESS

## Rebecca Wade – Intern

Rebecca is currently working towards a Masters in Health Administration at Hofstra University in New York, with the hopes to graduate in June 2023. She is drawn to Pyxis by their dedication to seeing health equity, accessibility, and inclusion become a reality for Americans from all walks of life, and the important work they do advocating for and engaging with populations that have been otherwise under-supported. In her free time, Rebecca enjoys theater and music, both as an audience member and, from time to time, as a performer.
